

Wall Lights

More than 200 incandescent and halogen wall lights are on display in our showroom. Both modern and traditional styles. This site will give you some idea as to the type and variety of wall lighting available in our showroom.

Halogen wall lights are modern and can provide large amounts of light.

Many have matching oyster and pendant lights.

Wall lights can throw all their light up and use the ceiling as a reflector to give a soft even light to a room.

Many modern wall lights are on display in our air conditioned show room.
